

RAPTOR-GAMING M3 PLATINUM

Product

The brand new RAPTOR-GAMING M3 PLATINUM re-invents the era of adjustable Gaming-Mice. It offers much more options of individualisation and the ergonomic shape is completely re-newed compared to all already existing mice of RAPTOR-GAMING.

The resolution of the laser mouse is adjustable by hardware in steps of 800, 1600, 2400 and 3200 dpi. A truly highlight is the new weight-change system. It allows the user through the RAPTOR-STEEL-WEIGHTS to not only define the weight but also the weight-point of the mouse.

The innovative ergonomic right-hand design and the special soft-touch surface secures that Gamers hands will never slip off the mouse again. The elegant silk-black and silver mouse also includes additional sets of mouse gliders and a flexible cable with a length of 2m.

Another innovative new feature is the integrated cable management system. This gives the Gamer the freedom to decide in 6 different ways on how the cable should leave the mouse.

The size of the mouse can be adjusted with the new RAPTOR-GAMING-WRIST-REST.

RAPTOR-GAMING M3 PLATINUM

To complete the extensive feature set of this Hardcore-Gamers weapon, two additional neoprene-bags are included in the delivery content. One bag is specially designed for the secured transportation of the Mouse (RAPTOR-MOUSEBAG XL) to LAN-Parties. The second, smaller bag, is designed for the secured transportation of the different weights (RAPTOR-WEIGHTBAG).
